GUJARAT - A RICH HERITAGE

The name 'Gujarat' is said to have been derived from the Prakrit 'Gujjar Ratta' and 'Gujjar Rashtra' (the land of the Gujjars) a tribe that entered India with the Huns in ancient times and settled in western India.

Many ancient remains in Gujarat reveal its ancient history. The Emperor Ashoka's rock edicts of the 3rd Century B.C. near Junagadh, and the rock inscription of King Skandagupta on the banks of Lake Sahasrabai tell of the imperial rule of the Maurya and Gupta dynasties over Gujarat. The magnificent rock temple of Modhera, Ghadir and Shrivastav testify to the splendour of the Solanki and Vaghela rulers in medieval times. Life in modern Gujarat, reflects these diverse aspects of its history.

The State is dotted with textile mills, petroleum refineries, fertilizer plants, co-operative dairy farms and other business enterprises. It is also the destination of pilgrims who come to seek inspiration from the homeland of Mahatma Gandhi, the 20th Century saint and philosopher of non-violence.

The geographical area of Gujarat is 1,96,024 square kilometres and its population is more than 6 crores (as per census 2011). Gujarat enjoys dominantly a tropical monsoonal climate. The rainfall is significantly heavy in the southern tip and south-eastern areas and goes on declining towards north-west. The normal Annual rainfall varies between 380 millimetres and 2,100 millimetres. The temperature is the lowest along the west coast showing obviously the maritime influences.

Gujarat's wild life, its riches of unspoiled beaches, mild and pleasant climate, superb heritage of art and architecture, colourful and spontaneous people with their traditional costumes, customs and life-style provides an attractive and pleasant travel experience for the tourists.

REFERENCES

- Name of headquarters or state
- Name of headquarters of district
- Name of headquarters of taluk
- Main city or other city
- Name of district
- Name of region
- Name of hill or hill range
- Temple, Church, Mosque, Rest House, etc.
